

A do it yourself (DIY) guide to the Aquaris M10 Ubuntu Edition tablet

Experience the reinvention of personal computing with the Aquaris M10 Ubuntu Edition tablet, from a true tablet experience to a full Ubuntu desktop experience. The future of personal mobile computing awaits you, why not try out the steps below?

Tablet

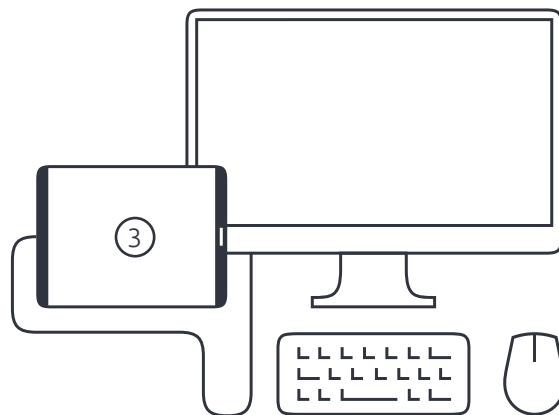

Voila! Your ultra-portable tablet is waiting for you.

DIY...

Laptop computer

Pair your bluetooth mouse and keyboard to create a laptop experience!

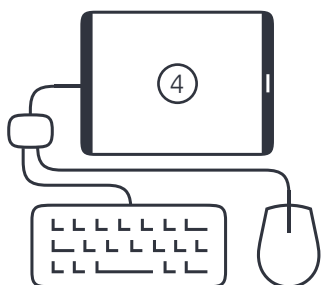

DIY...

Desktop computer

Fancy a classic Ubuntu Desktop experience? Simply connect your monitor to the tablet with HDMI and pair your keyboard and mouse via bluetooth.

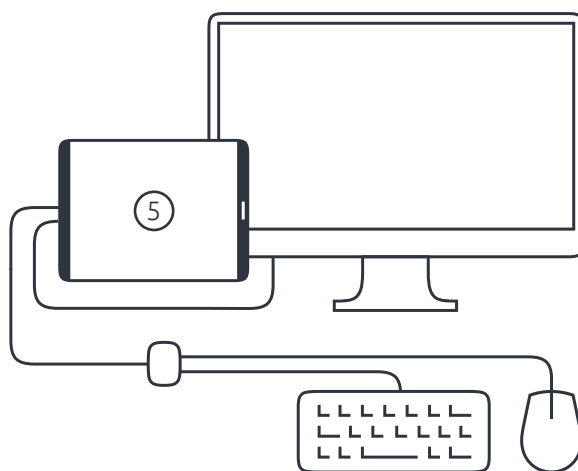

And if you're feeling more adventurous...

DIY...

Laptop computer take 2

Join all the dots on the go! Simply use a USB On-the-Go (OTG) cable to connect your tablet, keyboard and mouse and you're set!

DIY...

Desktop computer take 2

And if you want to go big! Link up your tablet to a monitor using HDMI and your favourite mouse and keyboard with the USB OTG cable.
